

Sidewinder Venom Compatibility

FINDING THE CORRECT VENOM KIT FOR YOUR MOSSBERG

Sidewinder Venom Kits are available for either 500 & 88 or 590 series Mossberg 12 gauge pump shotguns configured with 5/6 shot magazine tubes and 18.5" barrels. A quick way to identify your Mossberg model is by the shotgun's magazine tube cap (shown at right).

This compatibility guide lists Mossberg models which;

- 1) are compatible with Venom Kits, 2) will require modification, 3) will require the purchase of an 18.5" barrel, 4) are NOT compatible. Please contact Customer Service at 208-442-8000 or via email with specific questions about your shotgun model.

1. COMPATIBLE MOSSBERG SHOTGUNS

2. COMPATIBLE WITH MODIFICATIONS

These models are compatible if select components are removed or modified.

Sidewinder Venom Kits are compatible with Mossberg FLEX shotguns but the included kit forend will replace the factory FLEX forend. The Sidewinder Venom Kit forend does not have FLEX features. FLEX rear stock components are not compatible with the Adaptive EX Stock included in all Sidewinder Venom SE Kits.
