

CHOOSING A LENS COLOR

Costa lenses were made with changing light conditions in mind. To get the most out of them, it's important to choose the right color. We offer seven lens colors in multiple technologies, perfect for everything from low light like dawn to extremely bright light with blinding glare. Consider where you might spend your time to choose the best lens.

Brightest Light

GRAY (OGGLP and OGP)

Everyday base for the harshest sun conditions

BLUE MIRROR (OBMGLP and OBMP)

Open ocean and offshore fishing

GRAY SILVER MIRROR (OSGGLP and OSGP)

Offshore fishing, open-water sports, driving or any task in bright-light environments

Variable Light

COPPER (OCGLP and OCP)

Everyday base for changing light conditions

GREEN MIRROR (OGMGLP and OGMP)

Inshore / sight fishing

COPPER SILVER MIRROR (OSCGLP and OSCP)

Inshore / sight fishing

Low Light

SUNRISE SILVER MIRROR*

(OSSGLP and OSSP)

Highest light transmission with maximum protection, ideal for low-light conditions (dusk, dawn, cloudy days)

* These lenses are not suitable for driving
