

C4 Wind MOA™ Reticle

This reticle design has MOA tick marks extending out to 10 MOA on each side, allowing shooters to easily compensate for wind. Use the customized **WindMap** to make wind hold-off calculations based on your specific ammunition.

The **WindMap** works seamlessly with the C4 Wind MOA reticle, telling you how many MOA tick marks to hold into the wind to compensate for a 10MPH wind at 100-yard increments.

Example with .270 Winchester 130 Grain Spitzer

Reticle Subtensions

Reticle	Model	Units	A	B	C	D
C4 Wind MOA	9x	MOA	.31	.83	.75	1.5
C4 Wind MOA	14x	MOA	.18	.50	.50	1.0
