

RELAXED FIT

Relaxed fit is our traditional fit, built from the same fit block as the original Brigg Jacket and Herkules™ Bib. This fit allows for more ease around the body, creating mechanical ventilation in PVC garments, and offers a more generous fit for bulkier layers underneath.

ACTIVE FIT

Built with less ease to offer a more performance fit and increased range of motion. Active Fit is designed to work with technical layering systems, to optimize breathability. Offering a wide range of layering options for versatility and adaptability in changing conditions.
