

**BELTS:** Please give us enough information to make the right size belt.

Please include the following measurements.

1. Give your **PANTS SIZE** on all belt orders.
2. Give your **ACTUAL WAIST SIZE** by measuring a pants belt that fits. Measure from the outer edge of the buckle to the most used hole (as shown in drawing). Your pants belt should be 2" larger than your pants size.
3. When ordering a **GUNBELT** that is to be worn over clothing, please send your **PANTS SIZE** and the **CENTER HOLE** measurement. The **CENTER HOLE** is determined by using a tape and measuring your waist at the spot and angle that the belt is to be worn. Your **GUNBELT** is typically 4" to 5" large than your pant size.
