PN: P-MED-BLANKET-1-OD/SV

The Micro Trauma Kit NOW!®, or Micro TKN®, is our smallest version of the Trauma Kit NOW!® yet. Designed primarily for First Responders, the PRO version is equipped to treat life threatening bleeding and bridge the time gap between injury and arrival of advanced medical providers. Paired with a tourniquet, the PRO kit allows for treatment of extremity and junctional bleeding with a minimal amount of training. Usually belt worn in the small of the back, the PRO contents were selected to allow the flattest configuration possible for those long shifts seated in a vehicle.

The Micro TKN® is designed to be worn horizontally with minimal bulk - perfect for everyday carry, for law enforcement professionals, prepared citizens, or in low-profile mission sets. The inner carrier can be deployed with one hand or one finger from either the left or right side by pulling the BLIP featured pull tabs. The Micro TKN® consists of two main components - the outer MOLLE or Belt mounted pouch utilizing the Ten-Speed® technology, and a removable insert that keeps medical supplies organized.

Weight	261g
Part #	HW-TKN-MTKN-PRO BT-TKN-MTKN-PRO
Size	6" x 3.5" x 2.5"
Features	Patented Helium Whisper® (MOLLE Models Only) Hook and Loop System (Belt Models only)
